

General Mission of Student Chapters

- To develop relationships with local schools (K-12) and aid them in fostering student interest in future careers and study in engineering and engineering technology
- To encourage engineering undergraduate students to continue their studies on the graduate level
- To increase the interest of engineering graduate students in careers in engineering education
- To assist and encourage minorities and women to study and seek careers in the fields of engineering and engineering technology
- To promote scholarships, fellowships, and post-doctoral opportunities for ASEE student members
- To provide opportunities for students to gain insight into academic careers and teaching practices.
